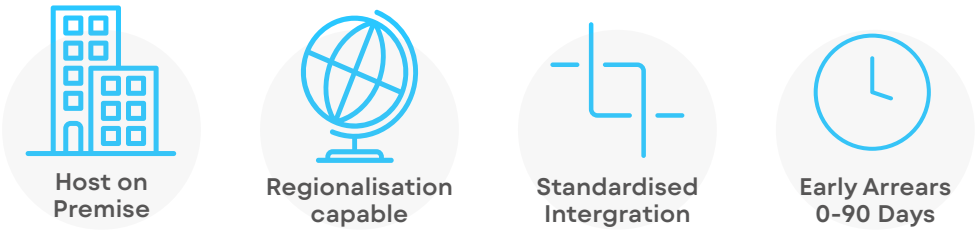
Solution Overview

QUALCO Collections & Recoveries
ACCELERATOR

A FASTER PATH TO EARLY COLLECTIONS

QCR Accelerator is a cutting-edge solution meticulously designed to revolutionise early-stage debt collections for small to medium-sized retail banks and lenders.

It is a unified collections platform that leverages our extensive experience in collections best practices and proven technology to automate and streamline debt management processes. It goes beyond the traditional methods, offering ready-to-use capabilities that ensure fast deployment and impactful results.



QCR Accelerator guarantees improved collection results for unsecured credit within the first 90-day timeframe across a range of products, including:

DESIGNED FOR GROWTH

Quick ROI

The QCR Accelerator offers pre-configured functionalities, ensuring speedy ROI and better cash flow for financial institutions.

Seamless Integration

The solution seamlessly integrates with existing systems, ensuring that the transition from legacy technology is smooth and disruption-free.

User-Centric Design

Its web-based user interface is modern, customisable, and easy to use, making debt management more efficient and user-friendly.

Flexibility and Scalability

It is a flexible and scalable solution that can be customised to meet the specific needs of any small retail bank or lender.

Increased Collection Efficiency

Maximise your debt recovery rates with custom automation strategies and manual error elimination.

Low Maintenance Cost

Minimise ongoing expenses, rapidly off-setting initial investment, and accelerate positive return on investment.

Reduced Implementation Cost

Simplify your collections strategy with minimal implementation and deployment costs.

Minimum Training Expenses

Lower training costs and time, accelerating effective use and productivity in a us-er-friendly, pre-configured environment.

OUT OF THE BOX CAPABILITIES

Data Structure & Roles

Accelerator customises customer, contact, and case structures for business needs. Enables rapid delivery via predefined file integration.

Integrated Decisioning

An integrated decision engine optimises treatment based on customer circumstances and pre-built rules defined by the business.

Pre-configured Segmentation

Accelerator includes pre-configured segments and exceptions, ensuring active case management through automated and manual treatments.

Treatment Mechanism

Clients receive a treatment mechanism which they can quickly adapt to their specific needs, while Exception Monitoring, Payment Plans, and Delinquency Statuses are already pre-configured.

Strategies & Worklists

Users can design and adjust adaptable, customisable strategies. Manual worklists facilitate agent teams in appropriately addressing exception cases.

Contact Templates

Automated, template-based communications tailored to each segment are sent through predefined collection strategies.

Best-in-class UI

Our web-based user interface is crafted for swift user adoption and enhanced productivity.

QUICK DEPLOYMENT

Our delivery approach is designed to guide you through each implementation phase with utmost care. We incorporate a clearly defined scope and preconfigured components to facilitate a straightforward experience.
Our emphasis is on providing training for swift understanding and enhanced business engagement. We focus on seamless system integration and tailor it to meet your specific requirements.
